Company description

(EN) IBM is the largest global technology and innovation company serving clients all over the world.
IBM is making markets by transforming industries and professions with data. We are remaking enterprise IT for the era of cloud. We are enabling systems of engagement for enterprises. IBM offers a wide range of technology and consulting services; a broad portfolio of middleware and the world's most advanced servers and supercomputers. IBM annually invests approximately 6% or it's revenue in R&D, focusing on high-growth, high-value opportunities.

(FR)IBM se positionne comme le partenaire privilégié des entreprises qui ont fait de l'innovation leur credo, en les aidant à se différencier de manière durable dans un contexte fortement concurrentiel. IBM met à leur disposition la palette de ressources la plus complète - compétences, systèmes, logiciels, services, financement, technologies - pour les aider et leur permettre de devenir des entreprises d'innovation.

(NL)IBM is één van de wereldleiders op het gebied van technologie en innovatie, met ca. 380.000 medewerkers en klanten in 175 landen. IBM biedt een uitgebreid portfolio van technologie- en consultancydiensten, waaronder een breed portfolio aan big data & analytics, IBM Cloud, security, mobile en social business oplossingen. Daarnaast beschikt IBM over de meest geavanceerde computertechnologieën - waaronder de snelste en nergiezuinigste supercomputers ter wereld - voortgebracht uit onze Research en Developmentcentra. IBM laat de wereld beter draaien door de stuwende kracht van technologie en data. Zo bouwen we met organisaties en overheden systemen die verkeersdoorstroming, watermanagement, gezondheidszorg
